

GROUP ACTIVITY - (SAME GROUP)

Activity: Design Your Own Tokenization Strategy

Objectives:

1. Create own tokenization method
2. Explain how it works
3. Decide what machine learning algorithm could use to the tokens
4. Justify design choices
5. Presentation

Tasks:

1. How will you tokenize?
2. Will you remove stopwords?
3. What bag of tools will you apply?
4. What Machine Learning Algorithm Could Use This?
5. Why is this algorithm suitable for your tokenization approach?
6. Write a Mini Algorithm for you task

Output:

1. Group presentation
2. Maximum of 10 minutes presentation
3. Example code is a plus

When:

March 09, 2026 – Next Meeting
